Investing is made very simple with Trades Point Capital! It is time to build your own investment portfolio with a self-directed account and save on fees.

About Tradespointcapital

We are a leading global investment solutions partner, dedicated to improving people's financial security through the world of socially responsible investments

Established in 2013 as an asset management firm, Tradespointcapital offers wealth creation opportunities through a unique blend of traditional asset management and alternative investment services. We enable businesses to thrive, and help our clients to maximize their returns and realise their most important goals. For over two decades, we have built a firm uniquely equipped to achieve these objectives and our reputation for quality research, investment expertise and value-added services has endeared us to clients both locally and internationally.

Throughout our history, we have strategically positioned ourselves to take advantage of growth opportunities within America, Europe, Asia and major international markets on behalf of our clients. Our disciplined and consistent approach to investment management has helped us not only to maintain long-term relationships with our clients, but also to continue to attract and retain good people.

At Tradespointcapital , our people are our most valued asset. The quality of our people is the cornerstone of our ability to serve our clients. For this reason, we invest significantly in identifying exceptional people, developing their skills, and creating an environment that fosters their growth as leaders. We encourage entrepreneurship and innovation at all levels because we believe they are key to developing good quality and committed professionals.

What We Do

We started by providing smart, simple investing, without the high fees and account minimums associated with traditional investment management. We invest your money in a globally diversified portfolio of low-cost index funds, and our cutting-edge technology helps you earn the best possible return, while optimizing your tax bill. This means we do things like automatic rebalanced, dividend reinvesting, and tax loss harvesting — services that were only available to the ultra rich until now or that most people found too time-consuming and tedious to do on their own.

Investing is just one part of your financial picture. So, we've introduced more ways to reach your goals and manage your money. High interest savings. Commission-free trading. And features — like automatically investing your spare change — that make it easier to save for your future. That's because we believe that everyone should have access to the tools they need to make smart financial choices.

WE'RE REINVENTING AN INDUSTRY

We took a look at the typical investor journey and knew something had to change. We are creating a fundamental paradigm shift by providing investors access to investments previously available to the top 1%. We are pulling back the curtain on the investing process to allow you to participate in wealth creation opportunities that were typically off-limits.

We believe in a path to realizing the potential of your money.

It's time to life the corporate veil on investing and allow all individuals, regardless of net worth, the opportunity to realize their next level. At Tradespointcapital, we're exposing investment opportunities so they're accessible to more people, in more ways. Our open-growth ecosystem levels the playing field so more people can access a life that was previously out of reach.
